

# Mid-Level C# and C++ Software Developers

## About This Job Opportunity

Optimal Satcom is seeking full-time C# and C++ software programmers to be an integral part of our software development teams.

Your duties will include:

- Software Development using C# / C++ on the Windows .NET platform
- Software Design, working from high-level requirements, prototyping, and algorithm design and development
- Implementation of new features and enhancements
- Performance Tuning, profiling and optimization
- Software Debugging and fixing problems
- Software Testing and Quality Assurance

## Your Qualifications

To apply you must meet the following criteria:

- Three (3) – Five (5) Years of relevant experience working with .NET C# (Web, WinForms, and/or WPF), Java, and/or C++
- A Bachelor's Degree in Computer Science or Computer Engineering from a reputable accredited institution
- Clean background check and references
- US Citizenship or Permanent Residence

Additional qualifications that will benefit your application:

- Experience working with Microsoft SQL Server databases
- Experience working with LINQ, WPF/XAML, WCF
- Experience developing web and mobile applications
- Experience working on large software code bases
- Experience working as part of a development team
- Experience with DevExpress

This job posting is for a full-time permanent position for work at our office in Herndon, VA. We offer excellent pay commensurate with qualifications and experience, and a comprehensive set of benefits.

Optimal Satcom is an Equal-Opportunity Employer.
